

Great flood of 2026

A washed out M-68 (top) will require several weeks to repair after suffering major damage.

Flooding has caused major problems on area roadways including (top and below at right) Heythaler Highway where workers have a major project to restore the surface.

County Road 451 is closed south of Heythaler Highway after floodwaters ripped through the roadway.

Walkers and bikers will have to wait until floodwaters recede to take in the scenic pathway.
